Aluminium Body

A S Motorsport Ltd are delighted to offer an Aluminium Body and are genuinely proud of their design.

With the support of Computer Aided Design (CAD) a wooden buck has been produced using Computer Numerical Control (CNC) techniques. The results have then been used to fashion a truly authentic aluminium body shape. We have been able to compare the symmetry and general overall silhouette and where needed, we have tweaked and refined the design giving the genuine form of the 1959 World Sports Car Championship winning vehicle.

Many hours of attention to detail and expertise go into constructing this work of art.

These Aluminium bodies are produced in England. They are created by craftsmen using traditional methods, which results in a very high standard of workmanship.

Each body is hand formed and attached to the chassis by the superleggera method of supporting tube work.
